

# Vernagel

# Cut out embarrassing spills

Vernagel is a super absorbent powder which prevents spillages and leaks by solidifying liquids. Vernagel is designed specifically to cope with bodily fluids - trapping them in a dry, semi solid gel that is convenient and easy to dispose of. This also means that patients are saved the embarrassment and indignity, which often follows an accidental spill.

## Eases nurse workload and saves laundry costs

Trials carried out in four hospitals confirmed that by preventing spills Vernagel sachets would save an average of 135 days a year in nurse time and more than \$6,600 a year on laundry costs.

## Reduces risk of cross infection

Vernagel solidifies bodily fluids, this prevents any spillages particularly when the bedpan or bottle is taken from the patient. Cross infection can occur when bodily fluids spill onto beds, floors, or onto other patients or equally when bedpans and urinals are taken to the pan room.

## Minimises or eliminates residual odours

Soaking wet beds are not nice to wake up to and the cleaning required can also be very time consuming and inconvenient for the nurse. Vernagel solidifies liquids eliminating spillages and splash backs thus increasing patient confidence and protecting the dignity of your patient through the night.

Vernagel can be easily disposed of in a macerator

This cross section of a male urinal shows how the Vernagel easily absorbs liquids contained within it to prevent spillages

### Vernagel Large Tub

Loose powder with scoop  
Weight - 4kg  
**Product Code: 456MA400**

### Vernagel Bottle

Loose powder  
Weight - 475gm  
**Product Code: 456MA475**

### Vernagel 100 Sachet

Easy to use sachets  
Weight - 450gm  
**Product Code: 450MA100**

Easy to use packaging enables the 100 sachet box to hang from racking in the pan room allowing easy access.
