1 SLIGHTLY THICK

Available Now!

DYSPHAGIA INNOVATION FOR EVERYONE

THICKENED READY-TO-DRINK RANGE

Introducing our new Flavour Creations IDDSI Level 1 Slightly Thick Ready-to-Drink range, available in our award-winning Dysphagia Cup to be enjoyed by children and adults living with dysphagia.

The new range has been designed to assist Speech Pathologists in the clinical evaluation and diagnosis of dysphagia in acute and community settings, particularly in children.

The Amylase Resistant™ IDDSI Level 1 range will be available in Water, Apple Juice, Protein Caramel Drink and Nutritionally Complete Apple Berry Drink.

Apple Berry Nutritionally Complete

- Amylase Resistant™
- 1.5 Kcal/mL
- Complete Nutrition
- 15g Protein
- 27 Vitamins & Minerals
- No Artificial Colours & Flavours

WHY ARE SLIGHTLY THICK FLUIDS IMPORTANT FOR CHILDREN?

Thickened fluids are often recommended for children who have swallowing difficulties (dysphagia). Feeding and swallowing problems can arise with neurological disorders such as cerebral palsy, acquired difficulties including traumatic brain injuries and developmental delays, (e.g., Down's syndrome).

Left untreated, swallowing difficulties in children can lead to faltering growth, aspiration pneumonias, gastroesophageal reflux, and/or the inability to establish and maintain proper nutrition and hydration.

Flavour Creations IDDSI Level 1 Slightly Thick range is designed to help children from 1 year to safely enjoy the experience of drinking and to ensure adequate nutrition and hydration.

NEW AMYLASE RESISTANT™ TECHNOLOGY

ENSURING EVERY MOUTHFUL IS SAFE

For the past 26 years, Flavour Creations has been helping people with dysphagia get the nutrition and hydration they need through thickened drinks, powders, snacks, and desserts, all formulated to IDDSI standards.

Flavour Creations is continually pushing innovative technology to deliver safe products. In 2022, Flavour Creations implemented our new Amylase Resistant™ technology, a patented formula that safeguards our range of 80+ products against amylase, an enzyme found in saliva that breaks down starches in foods and fluids.

Now, with the benefits of Amylase Resistant™ and our patented Dysphagia Cup, people living with dysphagia can enjoy their favourite texture-modified foods and drinks – in a way that supports safety, nutrition and promotes confidence and brings dignity back to dining.

BENEFITS OF OUR AMYLASE RESISTANT™ FORMULA:

- Safer Swallow
- Stable Thickness
- Better Quality and Taste
- Promotes Confidence
- Supports Nutrition and Hydration
