**Eligibility for Small Business Support**

– **\$20,000 instant asset write-off\***

\*The **Small Business Support – \$20,000 instant asset write-off** measure announced by the Australian Government is for the **2024-25 income year**. This measure will be in place until **June 30, 2025**.

- Small businesses with an aggregated turnover of less than \$10 million will be able to immediately deduct the full cost of eligible assets costing less than \$20,000.
- These assets must be first used or installed ready for use between **1 July 2024 and 30 June 2025**.
- The \$20,000 threshold will apply on a per asset basis, so small businesses can instantly write off multiple assets.
- Assets valued at \$20,000 or more (which cannot be immediately deducted) can continue to be placed into the small business simplified depreciation pool and depreciated at 15% in the first income year and 30% each income year after that.

# A platform built for faster and smarter diagnostics

The **MESI mTABLET** is more than just a device – it simplifies diagnostics and saves valuable time with modular & wireless hardware, smart software, and seamless connectivity.

## MESI mTABLET

A medical-grade tablet that serves as the central hub.

## Smart software

Extend diagnostic capabilities with intelligent apps for decision-making support.

## Wireless diagnostic modules

Quickly measure key parameters including ankle-brachial index (ABI), ECG, spirometry, temperature and more.

## Seamless connectivity

Access and share results your way: from simple PDF storage to full-scale EHR connectivity.

## Designed for everyday use

- > Easily connects with existing infrastructure.
- > Portable enough for outreach and remote care.
- > Works in primary care, specialist clinics and hospitals.

## Did you know?

In Australia, roughly **90% of MESI mTABLET users** connect it with their EHR system, setting a new standard for **integrated diagnostics**.
