**Eligibility for Small Business Support –**  
**\$20,000**  
**instant asset write-off\***

\*The **Small Business Support – \$20,000 instant asset write-off** measure announced by the Australian Government is for the **2024-25 income year**. This measure will be in place until **June 30, 2025**.

- Small businesses with an aggregated turnover of less than \$10 million will be able to immediately deduct the full cost of eligible assets costing less than \$20,000.
- These assets must be first used or installed ready for use between 1 July 2024 and 30 June 2025.
- The \$20,000 threshold will apply on a per asset basis, so small businesses can instantly write off multiple assets.
- Assets valued at \$20,000 or more (which cannot be immediately deducted) can continue to be placed into the small business simplified depreciation pool and depreciated at 15% in the first income year and 30% each income year after that.

# The smartest wireless Ankle-Brachial Index

Based on current recommendations and practices in Australia, ABI measurement is **recommended for people at increased risk** of peripheral arterial disease (PAD), especially:

- age  $\geq 65$  years
- age  $\geq 50$  years with diabetes, smoking history, or hypertension
- individuals with known atherosclerotic disease (e.g., coronary artery disease, stroke)
- Aboriginal and Torres Strait Islander peoples aged  $\geq 50$  years

## Why MESI mTABLET ABI?

- SmartArm™ detection – to determine the higher blood pressure of the two
- 3-cuff simultaneous measurement
- Multiple cuff sizes and ability to mix-and-match different size cuffs during one measurement
- Pulse waveforms and oscilation graphs
- Advanced review and alerts, thanks to PADsense™ algorithm
