Fixomull Stretch Adhesive Tape

Fixomull® stretch tape allows easy and quick fixation especially of large dressings. Application and fixation of dressings requires excellent adaptability and flexibility. The product can be cut to size, saving material and reducing cost. Fixomull® stretch is coated with a hypoallergenic* polyacrylate adhesive. The backing material is made of transversely stretch-able non-woven polyester. Fixomull® stretch adapts well even to highly contoured parts of the body. Constriction, congestion and disturbances of blood circulation is prevented. Fixomull® stretch is very well tolerated even by patients with sensitive skin.

Fixomull® stretch is suitable for:

- Wide-area fixation of wound dressings, particularly on joints, frequently moved and contoured parts of the body
- For secure fixation of tubes, catheters, measuring devices and instruments

Handycrepe Hospital Non-Adhesive Crepe Bandage

The Handycrepe Hospital is a high-quality, non-adhesive light support crepe bandage, designed for wound care and dressing retention. It offers reliable performance in both clinical and hospital settings. It is ideal for various healthcare applications, including dressing retention for post-operative wounds, providing light compression for mild sprains or strains, and securing wound dressings in both emergency and routine care settings.

- Lightweight Support: Provides gentle compression and support, making it ideal for securing dressings or offering light immobilisation.
- Durable Material: Crafted from premium-grade cotton for optimal elasticity and durability, ensuring consistent performance during use.
- Non-Adhesive Design: Easy to apply and remove without causing discomfort or irritation to the patient.
- Versatile Application: Suitable for use in general wound care, post-operative dressing retention, and light sprain support.

AQUACEL® Ag Foam Dressings

AQUACEL® Ag Foam is a Hydrofiber™ foam dressing with silver that has been designed to be a primary dressing. AQUACEL® Ag Foam is comprised of a soft foam pad for fluid absorption offering both a waterproof and bacteria barrier to prevent moisture transmission and protection from bacteria penetration. It is ideally used for exuding acute or chronic wounds prone to infection.

Benefits of this dressing:

- Lock in wound exudate, including bacteria
- Help maintain a moist wound healing environment
- Help prevent lateral spread of fluid, reducing risk of maceration
- Micro-contour to the wound bed, minimising dead space where bacteria can grow

EBOS Code: 10008862

Dewar Liquid Nitrogen Container, 20 Litre

- Capacity: 20L
- Weight (empty): 9.5kg
- Caliber (neck opening of dewar): 50mm
- Outer diameter of dewar: 394mm
- Height of dewar: 672mm
- Static evaporation rate: 0.12L/d
- Static holding time: 168 days

\$1,095

EBOS Code: 10009495

Dewar Liquid Nitrogen Container, 10 Litre

- Made of high-strength aluminium alloy
- Adopting advanced powder coating technique
- Safety lock lid
- Neck plug
- Leather (PU) bag and ladle

\$952

EBOS Code: 10009494

High Frequency Desiccator Bovie DERM 942

The Bovie DERM 942 high frequency desiccator is designed for use in electrosurgical procedures performed by appropriately trained healthcare professionals.

Key features:

- 40 watt high frequency desiccation output
- Adjustable power settings in 0.1 watt increments within the first 10 watts, available in monopolar and bipolar modes
- Universal power input (100-240 VAC)
- Ground reference design, meaning a separate grounding pad is not required
- Incorporates integrated circuitry designed to support consistent device performance and thermal management

Intended for use by clinically trained medical professionals.

Equipment

EDAN ECG 210mm Express Basic

- 8.4" LCD screen
- Enhanced weak signal detection
- Comprehensive filters and anti-noise technology
- Real-time ECG waveforms freezing and review
- Advanced Smart ECG Medical Interpretation Program algorithm for automatic measurements and interpretation
- Built-in high resolution thermal printer with external USB printer (optional) support
- Large internal memory which can be enlarged by USB flash disk
- Built-in data management with reports review
- LAN/Wi-Fi (optional) connections
- Bi-directional communication with SE-1515 Data Management System
- On-board PDF creator making file transfer simple and seamless

Intended for use by clinically trained medical professionals.

\$2,250

EBOS Code: 10012789

Edan SE1515 PC Based ECG Machine

- Simultaneous 12 lead acquisition
- Real-time ECG waveforms display on PC screen
- Auto /Manual measurement and interpretation
- WORD, PDF and JPG format reports transferred via E-mail
- Optional advanced analysis functions: Timed vectorcardiogram, VCG(3D), SAECC,QT interval dispersion, HRT, HFECG, Frequency Spectrum cardiogram
- 30s-900s HRV (Heart Rate Variability) sample and analysis

Intended for use by clinically trained medical professionals.

\$1,599

EBOS Code: 10012790

Hillrom CP150 Interpretive ECG with Spirometry

- Seven-inch colour, touch-screen display for easy entry of patient data
- Preview ECG reports prior to printing, saving time and reducing paper costs
- Three, six, or full 12-lead ECG preview options
- Optional adult and pediatric MEANS ECG interpretation software
- Battery operation lets you easily transport your device to the patient
- Simplified EMR connectivity without a complicated interface
- Instant-on powers the device up quickly to take an ECG at a moment's notice
- Stores up to 100 test results on the device or transfer to a USB memory stick

Intended for use by clinically trained medical professionals.

\$5,786

EBOS Code: 10008988

ZOLL AED Plus Fully Automatic Defibrillator

ZOLL AED Plus® is an automated external defibrillator (AED), designed to deliver support during cardiac emergencies. The ZOLL AED Plus® offers advanced features that make it an essential addition to any healthcare setting, workplace, or public space.

Intended for use by clinically trained medical professionals.

\$2,095

EBOS Code: 10025164

iPAD Automatic External Defibrillator AED CU Medical Systems

The AED is powered to automatically read a patient's ECG and determine if a patient undergoing cardiac arrest requires defibrillation. If a shockable rhythm is detected, the device automatically charges itself (charging time of 9 seconds) and a defibrillating shock is delivered when the user presses the SHOCK button.

Intended for use by clinically trained medical professionals.
