Supporting Your Day Hospital with Tailored Solutions

Dear Valued Customer,

EBOS Healthcare is proud to continue our Corporate Sponsorship of Day Hospitals Australia. Our valued relationship enables us to collaborate and support Day Hospitals Australia's advocacy for the Australian Day Hospital sector.

As a Diamond Sponsor of the Day Hospitals 2025 Australia National Conference, taking place from August 27th to 29th in Canberra, we look forward to the informative program and the opportunity to again support Day Hospitals throughout Australia.

Please visit EBOS Healthcare at booth 46.

Thank you for choosing EBOS Healthcare Australia.

Warm regards,

The Day Hospital Solutions Team
EBOS Healthcare

DERMABOND® Wound Closure

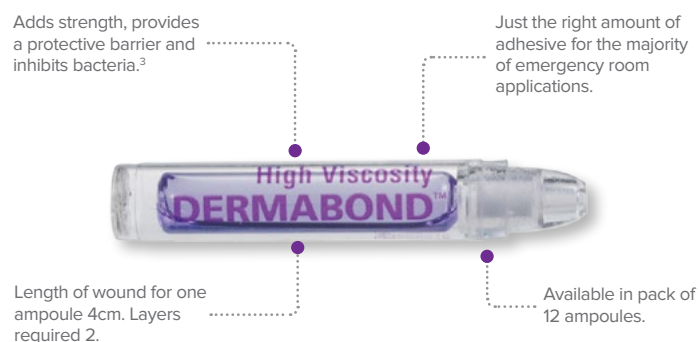

DERMABOND® is a precisely balanced formulation unlike any other TSA on the market.

Our proprietary formulation is a precisely balanced combination of three carefully sourced components. There is no other brand with the same formulation.

DERMABOND® Mini

Offers fast closure of small incisions and laceration.

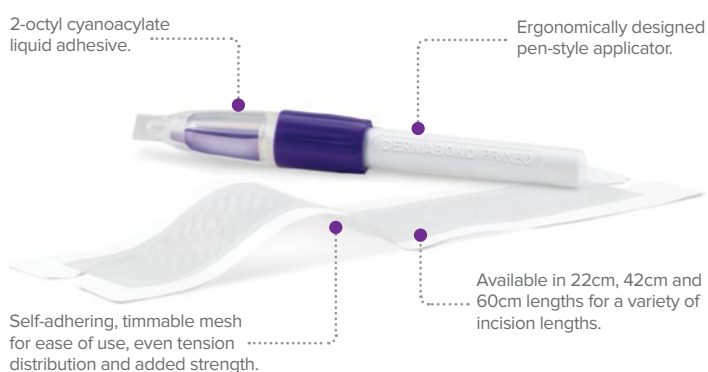

The trusted proprietary formulation of DERMABOND® ADVANCED® in a smaller size.

Dressings

Fixomull® Stretch Adhesive Tape

Fixomull® stretch tape allows easy and quick fixation especially of large dressings. Application and fixation of dressings requires excellent adaptability and flexibility – in the operating room, on the ward and in outpatient departments. The product can be cut to size, saving material and reducing cost. Fixomull® stretch is coated with a hypoallergenic* polyacrylate adhesive. The backing material is made of transversely stretch-able non-woven polyester. Fixomull® stretch adapts well even to highly contoured parts of the body. Constriction, congestion and disturbances of blood circulation is prevented. Fixomull® stretch is very well tolerated even by patients with sensitive skin.

Fixomull® stretch is suitable for:

- Wide-area fixation of wound dressings, particularly on joints, frequently moved and contoured parts of the body
- For secure fixation of tubes, catheters, measuring devices and instruments

EBOS Code	Description	UOM	PRICE

Handycrepe Hospital Non-Adhesive Crepe Bandage

The Handycrepe Hospital is a high-quality, non-adhesive light support crepe bandage, designed for wound care and dressing retention. It offers reliable performance in both clinical and hospital settings. It is ideal for various healthcare applications, including dressing retention for post-operative wounds, providing light compression for mild sprains or strains, and securing wound dressings in both emergency and routine care settings.

- **Lightweight Support:** Provides gentle compression and support, making it ideal for securing dressings or offering light immobilisation.
- **Durable Material:** Crafted from premium-grade cotton for optimal elasticity and durability, ensuring consistent performance during use.
- **Non-Adhesive Design:** Easy to apply and remove without causing discomfort or irritation to the patient.
- **Versatile Application:** Suitable for use in general wound care, post-operative dressing retention, and light sprain support.

Introcan Safety® IV Catheters

Introcan Safety® is a peripheral IV catheter with a passive fully automatic needlestick protection. It is a single-use device to generate intravascular and tissue access to sample blood, monitor blood pressure, or administer fluids and blood intravascularly. Introcan Safety® is also indicated for subcutaneous infusion therapies and 300 PSI power injector applications (18-24G). The device can be used for all patients for which infusion therapy is prescribed. No gender or age related limitations. Introcan Safety® can be used for adults, pediatrics and neonates.

Kelly Forceps Curved 14cm Surgical Grade Autoclavable Stainless Steel

The Kelly Forceps Curved Stainless Steel Surgical Instrument is designed for clamping blood vessels and holding heavy tissue during surgical procedures. With a curved profile, precision serrations on half the jaw, and larger finger rings for enhanced control, these hemostatic forceps are a trusted tool in general and exploratory surgeries. Autoclavable and passivated for corrosion resistance, they are built for durability and high performance in medical settings.

- Made from surgical-grade stainless steel.
- Curved jaws with horizontal serrations for secure clamping.
- Ergonomic finger rings and a locking ratchet mechanism.
- Passivated and matt-polished for corrosion resistance.
- Autoclavable and suitable for all standard sterilisation procedures.
- Individually packed and QC tested.

Dressings

AQUACEL® Ag+ Extra™ Dressing

AQUACEL® Ag+ dressings are antimicrobial primary dressings for use in wounds that are infected or at risk of infection. They are designed to manage the 3 key local barriers to healing - exudate, infection and biofilm. AQUACEL® Ag+ dressings incorporate proven Hydrofiber™ Technology and Ag+ Technology - a unique ionic silver-containing, antibiofilm formulation. AQUACEL® Ag+ Extra™ dressing is comprised of 2 layers of Hydrofiber™ Technology stitch bonded together making it 9x stronger and 50% more absorbent than standard AQUACEL® Ag dressing.

AQUACEL® Ag+ Extra™ dressing may be used for the management of:

- Wounds as a barrier to bacterial penetration of the dressing as this may help reduce infection
- Wounds where there is an infection or an increased risk of infection
- Diabetic foot ulcers, leg ulcers, (venous stasis ulcers, arterial ulcers and leg ulcers of mixed aetiology) and pressure ulcers/sores (partial and full thickness)
- Surgical wounds
- Traumatic wounds
- Wounds that are prone to bleeding; oncology wounds with exudate
- Wounds where bacteria are a suspected cause of (or a factor in) chronicity /non-progression.

Dressings

Tubular-Net™ Open Weave Retention Bandages

The Tubular-Net™ is an open weave retention bandage used for wounds where it can also provide isolation of I.V. lines and tubing. For this size, size 0 is suitable for application on the finger and toes. The Tubular-Net™ Open Weave Retention Bandage is also suitable for retention application that requires minimal skin contact.

The Tubular-Net™ Open Weave Retention Bandage provides effective retention for every part of the body, which is also suitable for both burns and neonatal intensive care units. It is a lightweight retention bandage that is constructed free of knots which eliminates the risk of pressure damage to the wound.
