

# Reduce the risk of infection.

3M™ Avagard™ Antiseptic CHG Hand Rub.

Contains Chlorhexidine Gluconate 0.5% w/v in 70% v/v Ethanol.

Most published clinical studies demonstrating reductions in HAIs have been associated with an ABHR containing at least 70% alcohol, 0.5% chlorhexidine and a skin emollient.<sup>1</sup>

3M™ Avagard™ makes it easy for healthcare workers, patients and visitors to comply fully with hand hygiene practices.

**3M™ Avagard™ Antiseptic CHG Hand Rub:**

Contains 0.5%w/v Chlorhexidine Gluconate (CHG) for residual and cumulative efficacy.

Formulated to be pH balanced. Containing both an emollient and moisturisers to nourish and maintain skin integrity.

Easily mounted at 'point of care' - wide range of placement options.

Faster dry time than gels and foams.<sup>2</sup>

Developed and manufactured in Australia.

Available in a handy 125mL bottle or 500mL pump.
