ACUTE  
DRESSING RANGE

# **AsGUARD<sup>®</sup>**

For over 30 years, Sentry Medical has been helping health care professionals provide exceptional care to their patients through a modern and quality driven portfolio.

.....

**A full range of dressings and tapes, ideal for low exuding wounds and difficult to dress areas.**

AsGuard Dressings have been specifically designed to provide a secure barrier to protect against potential infection and contagions.

The extensive range comprises of various unique shapes, aiding to dress difficult areas (such as joints) and are ideal for minor wounds and first aid.

## AsGUARD<sup>®</sup> Clear

A transparent adhesive polyurethane film with high moisture vapour permeability which adheres to the skin and forms a flexible and comfortable layer. AsGuard Clear conforms to the skin and allows easy visibility to wound healing.

## AsGUARD<sup>®</sup> Clear+

AsGuard Clear + provides a low adherent and breathable absorbent pad permeable to moisture. The waterproof polyurethane film assists with unnecessary dressing changes and protects from infection.

## AsGUARD<sup>®</sup> FLEX

AsGuard Flex Non-Woven Roll is a "cut to length" self-adhesive, non-woven fabric fixation tape. Highly comfortable, this tape is an ideal fixation of primary dressings for difficult contour areas without movement restriction.

## AsGUARD<sup>®</sup> FLEX+

AsGuard Flex + Non-Woven Dressings and Rolls combine an absorbent pad with a soft and comfortable non-woven adhesive backing. The self-adhesive rolls are "cut-to-length" and ideal for fixation of difficult contour areas.

## SurgiStrip<sup>®</sup>

SurgiStrip skin closures allow earlier post-operative suture or staple removal to assist natural healing and minimise scarring. SurgiStrips are a painless alternative for the closure of minor incisions or skin lacerations, enabling fast and easy application, with no need for anaesthetic and eliminating needle puncture marks.
